

Ficha técnica KS-IZG10

Designation: IZG10 ionization compressed air gun incl. AC adapter with cable and EU plug

Technical specifications

| | |
|---------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| scope of application | ionization gun for industrial environments with high effective power and robust design |
| Dimensions | Weight gun 200 g |
| Design / execution | ionizer gun, NPN, pulse operation 24VDC, M8 plug, DM8 plug connector, 3m cable |
| scope of delivery | - Ionization air gun - AC power pack for direct connection to the mains socket - 3 m power supply cable - Instructions for use |
| Technical note | |
| Derivation time (value unit norm) | Pos. 1,3 sec neg. 1,3 sec IEC 61340-4-7 |
| Offset voltage (value unit norm) | +/- 10 V IEC 61340-4-7 |
| Additional description | The cleaning of the ionizing devices must be included in the compliance verification plan. The function must be checked regularly using a charged plate monitor. |
