devices - Icon, Cmore Plus, Icon Flex.

Installation and calibration

No complicated installation, one click, install and ready to start to performing measurements. Make a calibration to your object and you will get a very fine tuned result.

Measurement and Drawing

Accurate measurement and annotation of lines, angles and circles. Image comparator helps you identify differences between your product and a golden sample. This is example of what you can do with the measurement part of the software.

You get at selected range of tools for measuring various objects. We have a user-friendly interface which is easily understood and intuitive to use.

Furthermore, this is an excellent way of getting correct and precise material for documentation to fulfill your customer quality control standards for example.

Live image vs. Golden Sample

Visus measurement application software

The Visus measurement application is compatible with ICON, CMORE PLUS and ICON Flex.
