OCCUPATIONAL AND  
SAFETY SHOES

ABEBA®

**Head office:**

St. Ingbert/ Germany

**Participation in trade fairs:**

Germany: A+A  
France: Expo Protection  
Great Britain: Safety & Health Expo  
Poland: ITM/ SAWO  
Czech Republic: Interprotec

**Production range:**

Occupational and safety shoes for:

Kitchen units  
Laboratories  
Hospitals  
Electrical industry (ESD-shoes)  
Doctor's offices  
Pharmaceutical industry  
Research institutes  
Food industry  
Biotechnology  
etc.

**PROTEKTOR-Group:**

Protektor S.A., Lublin  
Prabos Plus A.s., Slavičín  
ABEBA GmbH, St. Ingbert  
ABEBA France sarl., Saargemünd

**Headquarter and distribution centre in St. Ingbert**

Dear business partners,  
dear customers,

your confidence in us as a manufacturer of safety and occupational shoes honours us and confirms our philosophy of bringing together protective function, the highest possible wearing comfort as well as a healthy foot climate. Be assured that we do not relent in our continuous commitment to contribute to your safety and well-being. After all, our shoes accompany you for several hours a day.

Today, ABEBA is one of the largest and most modern shoe companies in Europe. Since June 1st, 2007 we belong to the long-established Polish company of PROTEKTOR. The PROTEKTOR group is a stock corporation and listed at the Warsaw Stock Exchange.

Our distribution centre in St. Ingbert, our French subsidiary ABEBA France sarl., our production facilities in Moldova and now even in Poland put us in an even better position to meet your demands. We see it as our

obligation to produce and sell modern safety and occupational shoes according to the European standard for our customers meanwhile in more than thirty countries. ABEBA Comfort Shoes are exclusively available at specialised technical outlets or specialist stores for occupational shoes - worldwide in more than 2,000 specialised shops with trained personnel. You can feel confident and safe with us!

In case you have any other questions regarding our company or our products, do not hesitate to call or write us! Our sales representatives in Germany and in nearly all other European countries will be glad to be of assistance and answer your queries.

Thank you for the trust that you place in our company!

Your **ABEBA®** team

ESD	6 - 7
ATEX/ HACCP	8 - 9
ORTHOstat/ SENSOstat	10 - 11
Standards/ Technology	122 - 125

## INDEX

126 - 133

## Factors influencing Electrostatic charge and discharge

- ▶ Climatic conditions (humidity, temperature)
- ▶ Soiling of the floor
- ▶ Speed of separation of parts
- ▶ Nature of material
- ▶ Nature of the surface
- ▶ Electrical resistance of the surface
- ▶ Material and construction of the shoe

The level of charge generated is influenced by atmospheric humidity (%RH). When humidity is low, charge will be greater and more damaging.

According to the ESD DIN EN 61340 standards, the ESD coordinator in the company must take into account both best and worse climatic conditions, for instance minimum temperature with minimum relative humidity or maximum temperature with maximum relative humidity, in order to test if the parameters of ESD protection are continuously in line with the standards.

## ESD Electrostatic Discharge

Shoes are classed as ESD shoes when the on-state resistance value of the system person-shoe-floor is under  $3,5 \times 10^7$  or 35 MOhm according to EN 61340-5-1 (verification). The qualification of the shoes is made depending on the climate classifications 1 (15% relative humidity), 2 (25% relative humidity) and 3 (50% relative humidity) according to EN 61340-4-3  $< 10^8$  Ohm.

Attention should be paid to the different procedures of both of the test methods: EN 61340-4-3 metal balls in the shoe on a metal plate; EN 61340-5-1 human being in the shoes on a metal plate or the floor used.

Shoes used for primary grounding in ESD protection must be selected in combination with the floor covering to be used so that the combined resistance to ground ( $R_g$ ) is in the range required. (Please, refer to the information leaflet in the carton.)

**Warning:** ESD shoes are not suitable for electricians respectively when working on sources with electric voltage.

### INFORMATION

The electrical on-state resistance can be strongly affected by the climate conditions.

#### Electrical resistance and protection against electrostatic phenomena

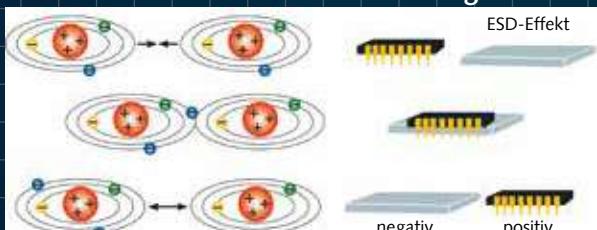

ESD-footwear as primary grounding in the system of person/shoe/floor

conductive shoes	antistatic shoes	insulating shoes
EN ISO 20345:2011 EN ISO 20347:2012	EN ISO 20345:2011 EN ISO 20347:2012	EN 50321
symbol <b>C</b>	symbol <b>A</b>	
EN ISO 20344:2011 $R \leq 1 \times 10^5 \Omega$ (0,1 MΩ)	dissipative footwear EN 61340-4-3 $1 \times 10^5 \leq R < 1 \times 10^8 \Omega$ (0,1 MΩ to 100 MΩ)  system person/ shoe/ floor  EN 61340-5-1 $R_s < 3,5 \times 10^7 \Omega$ (0,1 to 35 MΩ)	EN ISO 20344:2011 $1 \times 10^5 \leq R < 1 \times 10^9 \Omega$ (0,1 to 1000 MΩ)
$10^5$	$10^8$	$10^9$
		$\Omega$ (Ohm)

**explanations:**

the symbols A and C mark additional requirements of occupational- and safety shoes regarding electric property  
 $R$  = electrical resistance  
 $R_s$  = ground resistance

#### Formation of electrostatic charge

## Technical Information

When setting up an "EPA area", the following question should always be asked: how many volts can the component withstand?

Because it requires only approximately:

- **3000 Volt**, to let man having a disagreeable sensations
- **100 Volt**, to delete information from a magnetic data carrier
- **50 Volt**, to generate sparks which can ignite explosive gases
- **30 Volt**, to damage electrical components
- **5 Volt**, to damage highly sensitive hard-disc reading heads during their production.

In many cases discharges cause "latent damage" that manifest as defect or trouble only after a certain period of time or under specific circumstances.

### INFORMATION

For the daily function testing of the shoes the use of test stations has been established. There the resistance of person and shoe is measured. Attention should be paid to the separate measuring to the feet.

## Resistance Terminology

$10^3$ Ohm	=	0,001 MOhm	=	1 kOhm
$10^4$ Ohm	=	0,01 MOhm	=	10 kOhm
$10^5$ Ohm	=	0,1 MOhm	=	100 kOhm
$10^6$ Ohm	=	1 MOhm	=	1.000 kOhm
$10^7$ Ohm	=	10 MOhm		
$10^8$ Ohm	=	100 MOhm		
$10^9$ Ohm	=	1.000 MOhm	=	1 GOhm
$10^{10}$ Ohm	=	10.000 MOhm	=	10 GOhm
$10^{11}$ Ohm	=	100.000 MOhm	=	100 GOhm
$10^{12}$ Ohm	=	1.000.000 MOhm	=	1.000 GOhm

## Definition

### ESD

#### Electrostatic Discharge

Electrostatic discharge is caused by an imbalance of potential on charged objects or people by contact or close proximity.

### ESDS

#### Electrostatic Discharge Sensitive Device

### EPA

#### Electrostatic Protected Area

Area where sensitive devices can be handled directly with minimum risk of electrostatic damage.

### Electrostatic charge

Is produced by frictional contact and separation of two materials.

### Resistance to ground (Rg) EN 61340

It is the resistance from a surface or an item within an EPA, measured with a suitable ohmmeter and test probe.

### Latent damage

It is the damage caused by ESD to sensitive devices, which has the effect of reducing components reliability without causing immediate failure.

The symbol has been used since 1984 and denotes components and subassemblies that are ESD susceptible.

### „ESD SUSCEPTIBLE“

The symbol was introduced in addition to symbol No. 1 in 1993 and denotes ESD protective products such as anti-static mats, trucks, clothing, protective covering, cartons, materials, etc.

### „ESD PROTECTIVE“

## Ignition source electrostatic discharge

The electrostatic discharge is caused by an imbalance of potential on charged objects or people. A human body which is not provided with an ATEX/ ESD-shoe can be charged up to several kilovolts (kv). This generated charge can be decreased by the use of ATEX/ ESD-shoes. One way to estimate the risk of electrostatic discharge is to evaluate the minimum ignition energy (MIE) of the explosive atmosphere. The MIE - measured in millijoule (mJ) - is a parameter to describe the ignition sensitivity of an explosive atmosphere. 3 kv is needed to cause a noticeable sensation to a person. This is similar to an ignition energy of 0.7 mJ. There are explosive substances, for example Benzol, that may explode at an energy of only 0.2 mJ.

### Walking test

The experience shows that it is not enough just to control the resistance value of the ATEX/ ESD-shoes. To assure a sufficient protection against the static charge of employees, we recommend to add the walking test (according to EN 61340-4-5, charge must be below 100 V) to complete your security program for explosive areas. If ATEX/ ESD-shoes are used the following facts should be considered:

- ▶ Effective ATEX/ ESD-protection is only assured by using ATEX/ ESD-shoes in combination with an ESD-floor
- ▶ Dirt or dust on the outsole may lead to an isolating layer
- ▶ Orthopaedic insoles and modifications must not affect the resistance of the shoe

## ATEX - ABEBA - for explosive areas

**ATEX = ATmosphère EXplosible  
(explosive atmosphere)**

Accidents at work in explosive areas (EX-areas) mostly cause more severe consequences than in other areas. That's why work safety must be of prime importance in these particular areas. Where explosive air/ gas or air/ dust mixtures can't be embanked the following activities must be initiated:

- ▶ Classification of endangered areas into zones
- ▶ Avoiding of ignition sources
- ▶ Constructive explosion protection

One of the ignition sources can be the electrical discharge. This can be effectively avoided by antistatic garments, materials and tools. Our anti-static shoes have been used in ESD-areas (Electro Static Discharge) for years. Combined with an antistatic floor covering ABEBA ESD shoes avoid the electrostatic charge of the wearer.

The styles of our ATEX range are the first shoes within Europe certified for the use in EX-areas. We would certainly provide you with the corresponding TÜV certificates if needed.

The following norms and directives have been taken into account:

- ▶ EC Directive 99/92/EC
- ▶ EN 61340-4-3:2001 (climate classification 2)
- ▶ CLC/TR 50404:2003

Additionally our safety and occupational shoes come with the following specifications:

- ▶ Replaceable insoles
- ▶ Certified for customised orthopedic insoles (see markings)
- ▶ Metal free penetration resistance (S1P/ S3 styles)
- ▶ Washable up to 30°C (see article description)
- ▶ Many styles up to size 50 and **NEW to size 52** (see article description)

For more information, please contact us for our detailed ATEX flyer.

according to EN 61340-4-3,  
climate class 1, 23 ± 2°C, 12% ± 3% RH  
or  
climate class 2, 23 ± 2°C, 25% ± 3% RH

## HACCP

HACCP – Hazard Analysis Critical Control Points – is a monitoring system using risk analysis. This serves to identify, assess and combat major health risks caused by foodstuffs. In the production, treatment and processing of foodstuffs, all possible effects which might cause health problems by eating such food must be eliminated from the very beginning.

More information is available on your local HACCP website.

ABEBA Shoes are manufactured using only materials fully certified and approved by us. With this comprehensive quality assurance, we guarantee that no materials susceptible to bacterial infection are used.

Ask our trained personnel and specialist dealers for the correct footwear for your needs. Please ask us for any support.

HACCP – Hazard Analysis Critical Control Points

- Hazard** = Detection of the hazard
- Analysis** = Analysis of the hazard
- Critical** = Crucial for the control
- Control** = Control of the conditions
- Points** = Monitoring of the process

We are prepared!

Numerous styles have already been microbiologically tested by the Test and Research Institute Pirmasens (PFI) and have been certified according to Baumgart (HACCP-compliant).

Please refer to all shoes marked with "A-micro" and "washable at 30°C or 60°C".

Technology & Chemicals - sac@tch.es

## Individual and certified.

ORTHOstat is the latest individual orthopaedic insole from ABEBA according to EN ISO 20345:2011 and 20347:2012. Do you wear certified shoes and need an individually customised orthopaedic insole?

The BG Regulation 191 revised in 2007 prescribes that shoes used with customised orthopaedic insoles still have to meet the requirements of the EN ISO 20345:2011 or EN ISO 20347: 2012 standard.

### No problem with ABEBA shoes

ABEBA was the first to recognize this problem, find solutions and continues to improve them. In close cooperation with the orthopedic company **Doppler**, we have developed insoles which can be adapted individually: ([www.doppler-online.com](http://www.doppler-online.com))

**ABEBA occupational or safety shoes remain certified according to EN ISO 20347:2012 or 20345:2011 (please refer to individual article descriptions).**

### Standards – more than just numbers, they offer safety!

The personal protective equipment (PPE) guidelines guarantee your safety at work.

# ORTHOstat®

## The foot is the foundation of your body

Many joints responsible for your ability to move are placed between the head and feet. Some of them can cause problems over the course of your life.

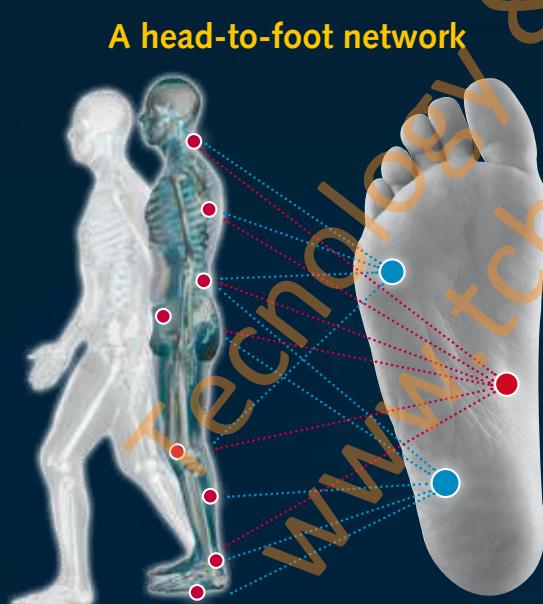

Often it is "only" a faulty position of the foot which moves your body's structural arrangement out of balance.

You can have a direct influence on your well-being, your knees, hips and back by wearing your personal ABEBA Orthostat insole. Relieve existing pain or even prevent its occurrence.

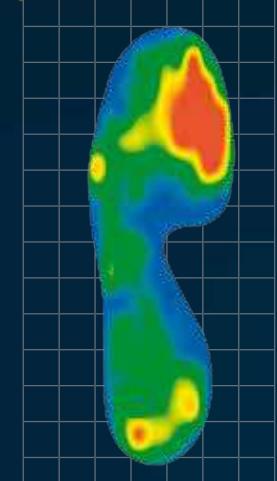

### Your personal prophylaxis

- Reduce your downtime
- Maintain your manpower
- Relieve the biomechanical stress on your body

## TECHNOLOGY

### PROBLEM

### SOLUTION

- ① Individually customised insole for use at work
- ② Anatomically customised heel pad
- ③ ESD-suitable in combination with ABEBA shoes
- ④ Supports the longitudinal and transverse arches
- ⑤ Anatomically shaped pelotte
- ⑥ Skin friendly
- ⑦ Light and dimensionally stable
- ⑧ Bedding of the metatarsal bone

**Occupational or safety shoes remain certified according to EN ISO 20347:2012 or 20345:2011 (please refer to individual article descriptions).**

## This is how the sensorimotor insole works

The stimulation areas on the sensorimotor insole correct the foot positioning which then can in turn have an impact on your knees, hip, pelvis and spine. Even headaches caused by being tense can be alleviated or completely healed. This correction will lead you to newfound balance.

### The effects:

- ▶ Straightening up due to "Relearning", motion sequence is being reprogrammed into the brain stem
- ▶ Body posture and gait pattern are being improved
- ▶ Triggering the brain by means of stimulation areas
- ▶ The muscles are being strengthened
- ▶ Selective impulses are being used to positively influence the locomotor system
- ▶ The joints are being relieved
- ▶ Wrong posture or motion patterns are being fixed systematically
- ▶ Discomfort is being resolved conservatively long-term

**Proprioceptive stimulation via the muscles, ligaments and joints of the foot to the brain stem**

Occupational or safety shoes remain certified according to EN ISO 20347:2012 or 20345:2011 (please refer to individual article descriptions).

## INFO

 **A°micro** is a new and innovative high-tech material which is especially water-resistant and breathable. It even surpasses hydrophobic leather. It is washable up to 30°C without shrinking and anti-bacterial, which is making it perfect for the use in hygienic sensitive areas. Additionally it can be equipped with various treatments such as silver ions.

Due to its special structure it is light and smooth but at the same time very tearproof and resistant.  **A°micro** replicates leather visually **without** becoming yellow due to direct sunlight.

## OCCUPATIONAL SHOES - **HIGH ORIGINAL**

- CE
- SRC slip resistance according to EN ISO 20347:2012
- Upper leather
- Heel patch leather
- PU sole with high slip resistance
- Sanitized® treated
- Animal fats, oil and fuel resistant
- TÜV GS - tested safety
- ESD dissipative according to EN 61340

An all-rounder for the highest demands in quality, comfort and design demands, which won't let you down on difficult floors thanks to its high resistance to slip.

Whether conventional, colourful or with smart design „high Original“ is always the right choice for work or leisure time. Every buckle is corrosion-resistant and nickel-free.

Full leather insole and integrated heel padding conveys a comfortable feeling and a pleasant foot climate.

„High Original“ convinces!

**DYNAMIC**

# OCCUPATIONAL SHOES - DYNAMIC

## Dynamic - Athletic design with lifestyle

- CE
- SRC slip resistance according to EN ISO 20347:2012
- Upper leather/ microfiber
- Special lining, respiration absorbing
- TPU sole with high slip resistance
- Replaceable acc Wave insole
- Orthopedic insoles possible
- Sanitized® treated
- ESD dissipative according to EN 61340

The ABEBA „dynamic“ range sets new standards for innovative designs and perfect wearing comfort, supported inter alia by our new replaceable „acc Wave“ insole.

The natural shape of the lasts conveys a sort of barefoot feeling and offers a stable foothold supported by the anatomically formed insole with a moulded heel area. Several flexing zones on the outsole support the bending performance and ensure your feet to roll off properly.

The styles of the „dynamic“ range exceed the requirements of the standards by innovative, tough upper materials, special moisture absorbing linings and the technology of the ESD-compliant TPU outsole with its amazing slip resistance.

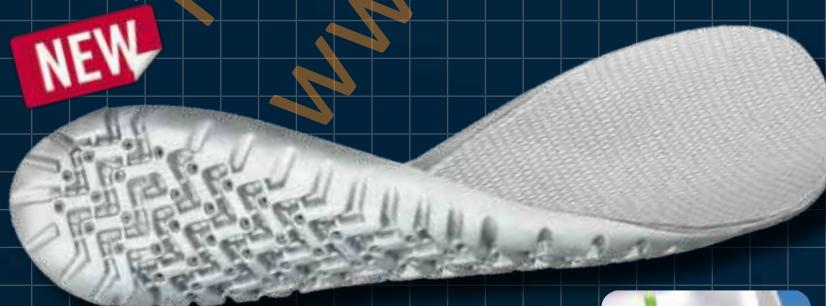

## TECHNOLOGY

Give them a try!

- 1 ESD dissipative according to EN 61340

# OCCUPATIONAL SHOES - RUBBER

## Rubber - The clog with rubber sole

- ▶ CE
- ▶ SRC slip resistance according to EN ISO 20347:2012
- ▶ Upper leather
- ▶ Heel patch leather
- ▶ Rubber sole with high slip resistance
- ▶ Sanitized® treated
- ▶ Acid and base resistant (for example: cleaning agents)
- ▶ ESD dissipative according to EN 61340

### Are you familiar with the requirements for proper footwear?

Especially in working areas where aggressive cleaning agents attack common soles, you're on the safe side with „rubber“. Its rubber sole features acid and base resistance and complies with the special rules to slip resistance on floors with ceramic tiles.

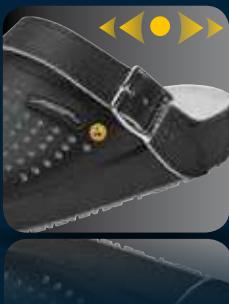

There's a midsole that absorbs shocks and an anatomically shaped footbed as well as a leather insole, so that you can get through a hard working day easily.

## TECHNOLOGY

- 1 ESD dissipative according to EN 61340
- 2 SRC slip resistance according to EN ISO 20347:2012
- 3 Rubber outsole
- 4 Acid and base resistance
- 5 Fuel resistance

### Did you know that...?

shoes should be worn on alternate days to improve hygiene and provide a better foot climate. After use, store the shoes in a well-ventilated place. Removing dust and dirt and regular care extend the life time of your footwear.

# OCCUPATIONAL SHOES - ARROW

**Arrow - A clog range that compels by high-end construction of soles**

- ▶ CE
- ▶ SRA slip resistance according to EN ISO 20347:2012
- ▶ Upper leather or microfiber
- ▶ Heel patch microfiber
- ▶ Double-layer PU-sole  
or
- ▶ Lightweight Mono-PU-sole
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340

The shock absorbing PU-midsole guarantees an ideal balance of stability and cushioning effect. It protects your ligaments and joints even while standing or walking on a hard floor all day.

The walking sole has a high slip resistance and is abrasion-proof thanks to its innovative tread pattern. A selection of premium upper materials as well as the variation of heel straps makes the Arrow the first choice for catering, healthcare, trade and industry.

Our metal buckles and rivets are naturally corrosion-resistant and nickel-free.

# OCCUPATIONAL SHOES - NATURE

## Nature - Mules and clogs with deep cork footbed

- ▶ CE
- ▶ SRC slip resistance according to EN ISO 20347:2012
- ▶ Upper leather
- ▶ Cork footbed, leather covered
- ▶ Special rubber sole with high slip resistance
- ▶ Animal fats, oil and fuel resistant
- ▶ Acid and base resistant
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340

The footbeds of the ABEBA range „Nature“ are characterised by high-value raw materials:

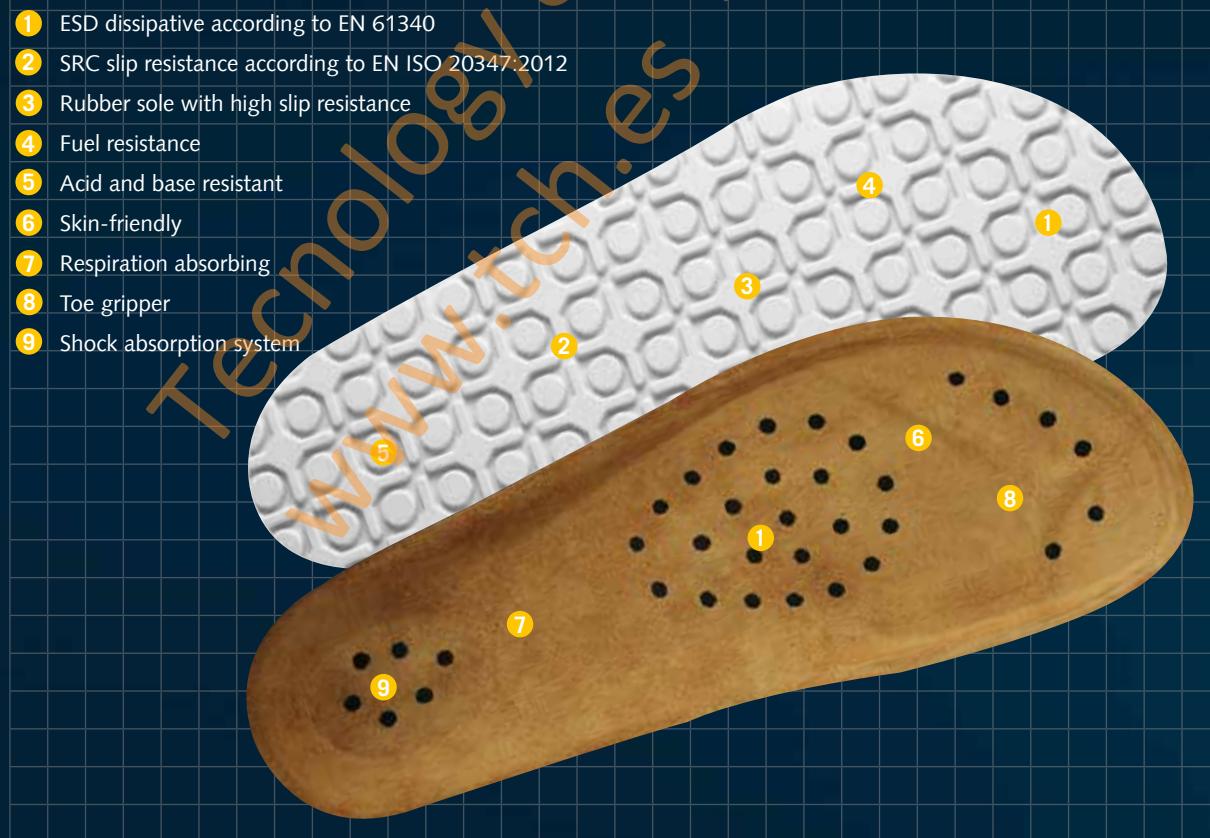

„Nature“ natural cork and top quality natural latex allow the wearer to enjoy exceptionally high comfort, flexibility and an ideal cushioning effect.

Deep heel cup, cross support of the arch, inner and outer length support, toe gripper and footbed edging result in excellent footing, promoting the natural standing position and facilitate to roll your feet from heel to toe. Your bodyweight is dispersed on the entire foot due to the anatomical shape of the footbed. The first class leather covering is especially skin-friendly and humidity absorbing. We take care of your safety as well as your comfort needs. The slip resistant walking sole made from special rubber features acid and base resistance as well as resistance to oil and fuel.

Feel naturally comfortable!

**Did you know that...?**

a walk of one kilometer corresponds to a load on your feet of approximately 35 tons. During his lifetime everyone covers on average the distance of 128.747 kilometers - which is three times around the earth. Those figures make clear how important it is to place high value on the quality and the wearing comfort of your footwear.

# OCCUPATIONAL SHOES - AIR CUSHION

**air cushion - Trendy retro style on an extremely light sole**

- ▶ CE
- ▶ SRA slip resistance according to EN ISO 20347:2012
- ▶ Upper leather
- ▶ Air cushion PU-sole with high slip resistance
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340

With the „air cushion“ range we proof that occupational shoes are not only functional and comply to the standards, they also convince with their stylish appearance.

With this range, we focus on safety as well as wearing comfort. The shoe is exceptionally light thanks to the permanently elastic flexible foam of the slip resistant PU walking sole. A comfortable fit and an anatomically shaped insole gets you through the day stress-free.

The processing of high quality leather and lining materials paired with contemporary design brings out our quality standards.

# OCCUPATIONAL SHOES - **LIGHT**

## **light - The right choice**

- ▶ CE
- ▶ SRA slip resistance according to EN ISO 20347:2012
- ▶ Upper leather/ microfiber
- ▶ Special lining, respiration absorbing  
Silver Point, Silver fibre or Comfortemp®
- ▶ Lightweight PU-sole with high slip resistance
- ▶ Replaceable acc Wave insoles
- ▶ Heel and foot lift
- ▶ Orthopedic insoles possible
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340
- ▶ ATEX® according to EN 61340-4-3,  
climate class 1, 23 ± 2°C, 12% ± 3% RH

With the „light“ range we offer the right occupational shoe for everyone who emphasises on technically sophisticated footwear and makes no compromises between quality, comfort and visual appearance.

Thanks to the characteristic PU sole the shoe is light and flexible but also sturdy and the built in heel shock absorber provides an ideal cushioning effect. With this range we have developed a shoe with a moderate heel gradient which relieves strains on joints, heel and back muscles. Our uniquely designed replaceable insoles offer a high wearing comfort.

We equipped the models with a special lining: Silverpoint provides an antibacterial protection by built in silver ions with an odor reducing and moisture absorbing effect.

Technology on „light“ soles.

HACCP-compliant

A-micro is a new and innovative high-tech material which is especially water-resistant and breathable. It even surpasses hydrophobic leather. It is washable up to 30°C without shrinking and anti-bacterial, which is making it perfect for the use in hygienic sensitive areas. Additionally it can be equipped with various treatments such as silver ions.

Due to its special structure it is light and smooth but at the same time very tearproof and resistant. A-micro replicates leather visually **without** becoming yellow due to direct sunlight.

**INFO**

All styles of our „light“ range are suitable for orthopedic insoles „ORTHOstat“ and „SENSOstat“.

# OCCUPATIONAL SHOES - **UNI6**

**uni6 - Experience the future!**

- CE
- SRC slip resistance according to EN ISO 20347:2012
- Upper leather/ microfiber
- Special lining, respiration absorbing with Silver Point or on steam®
- Soft PU midsole
- TPU sole with high slip resistance
- Replaceable acc Wave insoles
- Orthopedic insoles possible
- Sanitized® treated
- ESD dissipative according to EN 61340
- ATEX according to EN 61340-4-3, climate class 1, 23 ± 2°C, 12% ± 3% RH

„Uni6“ combines design and technology to a perfect multi-functional shoe which is dedicated to the lifestyle of a sophisticated wearer by its sporty style, its excellent fit, by the choice of high-tech materials and a young and trendy sole design. For the design of the double layer outsole we took into account the most recent developments of work and sports medicine. The soft PU midsole ensures an even cushioning effect on the entire sole and the stabilization of the midfoot. The TPU outsole impresses technically by its ideal slip and abrasion resistance. Also for the upper we have chosen the most recent developments of materials. Hydrophobic leathers as well as a specific microfiber with breathable and at the same time water-repellent features are making these shoes especially suitable for wet areas. New innovative lining materials and the replaceable acc Wave insole ensure the best compensation of temperature and moisture for a perfect foot climate.

## TECHNOLOGY

- 1 ESD dissipative according to EN 61340
- 2 SRC slip resistance according to EN ISO 20347:2012
- 3 Animal fats and oil resistant

# OCCUPATIONAL - REFLEXOR®

**Reflexor® - The shoe for ambitious individualists**

- CE
- SRC slip resistance according to EN ISO 20347:2012
- Upper leather
- Lining leather
- Hand-sewn seam
- PU-sole with high slip resistance
- Orthopedic insoles partially possible
- ESD dissipative according to EN 61340

Our „Reflexor®“ styles are made exclusively with premium calf leather and leather lining. Their distinguishing characteristic is the handmade high quality stitching.

The shoes on page 61 - 63 are even delivered with 2 replaceable footbeds. The active Reflexor® Massage footbed stimulates the foot's reflex zones by its knobs studs and enhances the blood circulation. You may also choose the smooth comfort footbed, covered with finest leather.

We also care about your safety. All Reflexor soles have got a medium heel with a wide step surface.

Your wellness at work.

## OCCUPATIONAL SHOES - **STATIC CONTROL**

### Static Control - High-tech on the foot

- ▶ CE
- ▶ SRA slip resistance according to EN ISO 20347:2012
- ▶ Upper leather with breathable Air-Mesh textile inlays/velours
- ▶ asc - anti slip contact sole
- ▶ acc Wave insole
- ▶ Orthopedic insoles partially possible
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340

The idea behind our Static Control range is to design a shoe that is light and sportive and scores with a maximum of technology and comfort. It is very versatile and can be used in almost all industries.

The rubber walking sole convinces with its sophisticated design: the drop wire thread pattern has got a softer blend that makes sure the grip is at its best. The cross thread pattern in a harder blend on the exterior gives you high side assistance and secure standing.

Decoupled joint stabilizers support your joints well and bring torsion control. A foamed, cushioning PU midsole relieves joints and ligaments additionally.

### TIP

For all professions where toe caps  
are not required

## AUTO- CLAVABLE

### OCCUPATIONAL SHOES - **AUTOCLAVABLE CLOGS**

#### **Autoclavable clogs – For maximum hygiene**

- ▶ CE
- ▶ SRC slip resistance according to EN ISO 20347:2012
- ▶ Upper made from special material
- ▶ Sole with high slip resistance
- ▶ Autoclavable material at 121°C, 15 min (no additives)
- ▶ Washable at 60°C (no additives)
- ▶ ESD dissipative according to EN 61340

Reusable and temperature-stable clothes and equipment are being treated by autoclave to kill all germs. This is done mainly in medical areas, microbiological or bio molecular research institutes as well as in the food and pharmaceutical industry.

The ABEBA clogs may be treated by autoclave at 121°C at 15 min with 2-3 bar thus meeting requirements of the respective sterilising level. They possess a slip resistant walking sole and are subject to the ESD dissipative according to EN 61340. A foldable heel strap secures your standing position.

# OUR SAFETY SHOES

## Your safety is our goal!

In many production steps and works in production the employees are faced with accident and health risks which can't only be avoided by internal and organizational actions. If violations of the feet by crashing into something, being trapped or by stepping into something sharp or pointed have to be taken into account, safety shoes are necessary to lower these risks and have to be worn.

On the following pages you find a selection of Abeba safety shoes all certified according to the EN ISO 20345:2011 standard. Whether it is a clog, a sandal, a slip-on or a boot get convinced by the quality and remarkable wearing comfort of Abeba safety shoes!

# SAFETY SHOES - **LIGHT**

## **light - The right choice**

- ▶ CE
- ▶ SRA slip resistance according to EN ISO 20345:2011
- ▶ Steel toe-cap (200 J) according to DIN EN 12568
- ▶ Upper leather/ microfiber
- ▶ Special lining, respiration absorbing  
Silver Point, Silver fibre or Comfortemp®
- ▶ PU-outsole
- ▶ Lightweight PU-sole with high slip resistance
- ▶ Replaceable acc Wave insoles
- ▶ Heel and foot lift
- ▶ Orthopedic insoles possible
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340
- ▶ ATEX® according to EN 61340-4-3,  
climate class 1,  $23 \pm 2^\circ\text{C}$ ,  $12\% \pm 3\% \text{ RH}$

With the „light“ range we offer the right occupational shoe for everyone who emphasises on technically sophisticated footwear and makes no compromises between quality, comfort and visual appearance.

Thanks to the characteristic PU sole the shoe is light and flexible but also sturdy and the built in heel shock absorber provides an ideal cushioning effect. With this range we have developed a shoe with a moderate heel gradient which relieves strains on joints, heel and back muscles. Our uniquely designed replaceable insoles offer a high wearing comfort.

We equipped the models with a special lining: Silver Point provides an antibacterial protection by built in silver ions with an odor reducing and moisture absorbing effect.

Technology on „light“ soles.

### INFO

 **A micro** is a new and innovative high-tech material which is especially water-resistant and breathable. It even surpasses hydrophobic leather. It is washable up to 30°C without shrinking and anti-bacterial, which is making it perfect for the use in hygienic sensitive areas. Additionally it can be equipped with various treatments such as silver ions.

Due to its special structure it is light and smooth but at the same time very tearproof and resistant.  **A micro** replicates leather visually **without** becoming yellow due to direct sunlight.

# SAFETY SHOES - UNIC

**uni6 - Experience the future!**

- ▶ CE
- ▶ SRC slip resistance according to EN ISO 20345:2011
- ▶ Steel toe-cap (200 joules) according to DIN EN 12568
- ▶ Upper leather/ microfiber
- ▶ Special lining with Silver fibre or Silver Point absorbing perspiration
- ▶ Foamed PU midsole
- ▶ TPU-sole with high slip resistance
- ▶ Replaceable acc Wave insoles
- ▶ Orthopedic insoles possible
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340
- ▶ **ATEX** according to EN 61340-4-3, climate class 1,  $23 \pm 2^\circ\text{C}$ ,  $12\% \pm 3\%$  RH

„Uni6“ combines design and technology to a perfect multifunctional shoe which is dedicated to the lifestyle of a sophisticated wearer by its sporty style, its excellent fit, by the choice of high-tech materials and a young and trendy sole design. For the design of the double layer outsole we took into account the most recent developments of work and sports medicine. The soft PU midsole ensures an even cushioning effect on the entire sole and the stabilization of the midfoot. The TPU outsole impresses technically by its ideal slip and abrasion resistance. Also for the upper we have chosen the most recent developments of materials. Hydrophobic leathers as well as a specific microfiber with breathable and at the same time water-repellent features are making these shoes especially suitable for wet areas. New innovative lining materials and the replaceable acc Wave insole ensure the best compensation of temperature and moisture for a perfect foot climate.

tion resistance

### INFO

On steam® is a new breathable high-tech microfiber lining with an absorption capacity of 8 times its weight in water. It offers a maximum comfort and a complete dryness for a perfect foot climate.

#### Technical characteristics:

- ▶ Absorbs moisture and desorbs it to the outside
- ▶ Breathable - antimicrobial - odor avoiding
- ▶ Temperature regulating
- ▶ Anti-allergy
- ▶ CO<sub>2</sub> neutral production
- ▶ Control of harmful substances according to Öko-Tex Standard 100

**acc Wave - air clima comfort**

**3582** open

**3580** closed

size 36-52

**acc Wave insole (air clima comfort)**

**acc - ventilation**

- ▶ Air circulates throughout the entire insole
- ▶ Immediate evacuation of perspiration
- ▶ Reduces drying time - over night
- ▶ Foot stays drier and cooler

**acc - insole shock absorption system**

- ▶ Shock absorption on all the plantar surface
- ▶ Arch support via conic air cushioned system
- ▶ Optimal comfort
- ▶ Supports natural movement

**acc - comfort system**

- ▶ Instant absorption by air cushion
- ▶ High level of comfort due to equal pressure

# SAFETY SHOES - ANATOM

**anatom - Combines maximum safety and best wearing comfort**

- ▶ CE
- ▶ SRC slip resistance according to EN ISO 20345:2011
- ▶ Steel toe-cap (200 J) according to DIN EN 12568
- ▶ Upper leather/ microfiber
- ▶ Special lining with Silver fibre or Silver Point absorbing perspiration
- ▶ Shock absorbing PU midsole
- ▶ PU-outsole with high slip resistance
- ▶ Replaceable acc Wave insoles
- ▶ Orthopedic insoles partially possible
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340
- ▶ ATEX® according to EN 61340-4-3, climate class 1, 23 ± 2°C, 12% ± 3% RH

Our anatom range is the right choice for everyone who sets value on having a sturdy shoe that guarantees maximum safety and offers best wearing comfort at the same time. Thanks to its double-layer PU sole the anatom combines these features perfectly. The compact, abrasion-proof and sturdy walking sole has got a good resistance to slip and secures your standing position by using a torsion joint made from TPU.

The foamed and cushioning middle sole gives you enjoyable comfort. An asymmetrical heel simulates that the shoe is already worn in and stops the higher lever force while walking through the rounded and lifted exterior. The vertical interior reduces the risk of bending inwards.

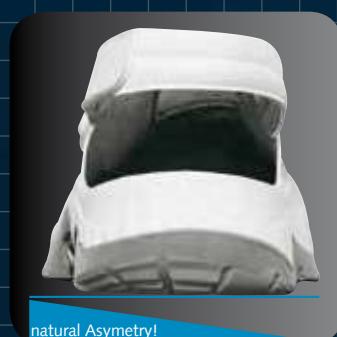

## TECHNOLOGY

- 1 ESD dissipative according to EN 61340
- 2 SRC slip resistance according to EN ISO 20345:2011
- 3 Self cleaning profile
- 4 Asymmetrical heel
- 5 TPU torsion waist (for lateral stability)
- 6 Flexzone supports the natural roll-of movement of the foot
- 7 Fuel resistance

### Asymmetrical heel

- ▶ Simulates a worn-in shoe
- ▶ Reduction of the higher leverage effect by a rounded and drawn-up outer side
- ▶ The vertical inner side reduces the foot's tendency to bend inwards

# SAFETY SHOES - CRAWLER

**crawler - Visions become reality!**

- ▶ CE
- ▶ SRC slip resistance according to EN ISO 20345:2011
- ▶ Alu toe-cap (200 joules) according to DIN EN 12568:2010
- ▶ Upper leather/ microfiber
- ▶ Special lining with Silver Point absorbing perspiration
- ▶ Foamed PU midsole
- ▶ TPU sole with extremely high slip resistance
- ▶ Replaceable acc Wave insoles
- ▶ Orthopedic insoles possible
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340
- ▶ ATEX® according to EN 61340-4-3, climate class 1,  $23 \pm 2^\circ\text{C}$ ,  $12\% \pm 3\% \text{ RH}$

## TECHNOLOGY

- 1 ESD dissipative according to EN 61340
- 2 SRC slip resistance according to EN ISO 20345:2011
- 3 Flexural zones optimize your natural motion sequence
- 4 High abrasion resistance
- 5 Comfortable cushioning effect and high flexibility
- 6 Joint stabiliser

Icon Aluminium toe-cap

See pages 120/121 for all replaceable insoles.

ABEBA's idea was to create a safety shoe with maximum technical accomplishment paired with intransigent comfort, sporty design and the lightness of trainers. That dream has now come true with our new ABEBA „Crawler“. ABEBA's very first range of safety shoes with aluminium toe-cap!

The „Crawler“ captivates by his unique design of the outsole with features like asymmetrical heel, lifted front end, integrated external heel stabiliser and flexural zones. Besides the special design of the outsole the selection of top quality upper- and lining materials as well as the replaceable acc Wave insoles maximum comfort and assist in creating a sporty look.

**INFO**

All styles of our „crawler“ range are suitable for orthopedic insoles „ORTHOstat“ and „SENSOstat“.

# SAFETY SHOES - STATIC CONTROL

## Static Control - High-tech footwear

- ▶ CE
- ▶ SRA slip resistance according to EN ISO 20345:2011
- ▶ Mcc mono coque cap (200 joules)
- ▶ Upper leather/ microfiber
- ▶ PU-midsole
- ▶ Asc - anti slip contact
- ▶ Replaceable acc Wave insoles
- ▶ Orthopedic insoles possible
- ▶ Sanitized® treated
- ▶ ESD dissipative according to EN 61340
- ▶ ATEX® according to EN 61340-4-3, climate class 1, 23 ± 2°C, 12% ± 3% RH

## TECHNOLOGY

- 1 ESD dissipative according to EN 61340
- 2 SRA slip resistance according to EN ISO 20345:2011
- 3 Best grip of the walking sole, siped tread pattern, soft rubber compound
- 4 Torsion waist hard rubber compound
- 5 Protection against twisting the ankle
- 6 Cross profile harder rubber compound
- 7 Acid and base resistant (for example: cleaning agents)
- 8 Fuel resistant

## Composite toe-cap - mcc - mono coque cap

- ▶ Certified according to DIN EN 12568  
Tested outside the shoe (200 joules)
- ▶ Certified EN ISO 20345:2011  
Tested inside footwear (200 joules)
- ▶ High impact resistance
- ▶ High resilience
- ▶ Thermoplastic polyamide
- ▶ Lighter than aluminium
- ▶ Shock resistant mono material
- ▶ 50 % lighter than steel
- ▶ Metal free

The idea behind our „Static Control“ range is to design a shoe that is light and sportive and scores with a maximum of technology and comfort. It is very versatile and can be used in almost all industries.

The rubber walking sole convinces with its sophisticated design: the drop wire thread pattern has got a softer blend that makes sure the grip is at its best. The cross thread pattern in a harder blend on the exterior gives you high side assistance and secure standing.

Decoupled joint stabilizers support your joints well and bring torsion control. A foamed, cushioning PU midsole relieves joints and ligaments additionally. The built in mcc composite cap is extremely shock-resistant, highly elastic (viscous) and 50 % lighter than steel.

All styles are fitted with the replaceable acc Wave insole which improves a healthy foot climate.

## INFO

All styles of our „Static Control“ range are suitable for orthopedic insoles „ORTHOstat“ and „SENSOstat“.

## SAFETY SHOES - **BUSINESS MEN**

**Business Men – The safety shoe for sophisticated clients**

- ▶ CE
- ▶ SRA slip resistance according to EN ISO 20345:2007
- ▶ Steel toe cap (200 joules) according to DIN EN 12568
- ▶ Upper leather
- ▶ Lining „on steam“®
- ▶ ESD dissipative according to EN 61340

If you need a quality safety shoe that also goes well with a suit, don't look any further.

You may choose between genuine wingtip style with Chilly-perforation and a puristic model with Derby-cut. We now have built the bridge between discreet, elegant looks, functionality and safety:

All models were manufactured from water-repellent cow leather. Bare leather lining absorbs your sweat and provides good foot climate. The natural surface and structure of the leather stays the same because of its special dyeing method. And you don't have to miss the wearing comfort due to of the comfortable footbed and the rubber walking sole. The sole also displays a very good slip resistance and is oil and fuel-resistant.

To protect your feet from any impacts, we have equipped the „Business Men“ range with naturally formed steel toe caps.

### **Steel toe-cap**

# TECHNICAL INFORMATION

## Slip resistance according to EN ISO 20344-20347:2012

In 2004 the standards EN ISO 20344-20347:2004 have been introduced, supplemented in 2007 by appendix A, concerning requests for slip resistance which are now regulated by the latest standards EN ISO 20344-20347:2012.

For testing the slip resistance, the shoe is fixed in different positions in a measuring device and is drawn over the various test floorings. The established value is called slip coefficient. Tests are performed on various flooring materials such as ceramic

tiles with SLS and steel floor with glycerol. Depending on the result of the tested shoe on ceramic tiles or steel floor or even on both, the slip resistance is classified into SRA, SRB or SRC. In standard EN ISO 13287:2007, replacing DIN 4843 part 100 earlier used in Germany, the testing processes are described in detail.

For more information please contact any authorised test and certification institute.

## TECHNOLOGY

### SLIP RESISTANCE // GLIDE SAFETY EN ISO 20344-20347:2012

<b>SRA</b>	Slip resistance on floors with ceramic tiles with SLS (sodium lauryl ether sulfate solution)
<b>SRB</b>	Slip resistance on steel floor with glycerol
<b>SRC</b>	Slip resistance on floor with ceramic tiles with SLS and on steel floor with glycerol (SRC = SRA + SRB)

## TECHNICAL INFORMATION

### Mono coque cap, Steel toe-cap and Aluminium toe-cap

mcc - mono coque cap

- ▶ Certified according to DIN EN 12568  
Tested outside the shoe (200 joules)
- ▶ Certified according to  
EN ISO 20345:2011  
Tested inside footwear (200 joules)
- ▶ High impact resistance
- ▶ High resilience
- ▶ Thermoplastic polyamid
- ▶ Lighter than aluminium
- ▶ Shock resistant mono material
- ▶ 50 % lighter than steel
- ▶ Metal free

Steel toe-cap

- ▶ Certified according to DIN EN 12568  
Tested outside the shoe (200 joules)
- ▶ Certified according to  
EN ISO 20345:2011  
Tested inside footwear (200 joules)

Aluminium toe-cap

- ▶ Certified according to DIN EN 12568:2010  
Tested outside the shoe (200 joules)
- ▶ Certified according to  
EN ISO 20345:2011  
Tested inside footwear (200 joules)
- ▶ 50 % lighter than steel
- ▶ Better balance between heel and forefoot

### A-micro

A-micro is a new and innovative high-tech material which is especially water-resistant and breathable. It even surpasses hydrophobic leather. It is washable up to 30°C without shrinking and anti-bacterial, which is making it perfect for the use in hygienic sensitive areas. Additionally it can be equipped with various treatments such as silver ions.

Due to its special structure it is light and smooth but at the same time very tearproof and resistant. A-micro replicates leather visually **without** becoming yellow due to direct sunlight.

### acc Wave insole (air clima comfort)

# TECHNICAL INFORMATION

## SILVER FIBRE

The special, silver fibres are manufactured by using pure silver and a certain thread; these are melted together in a special procedure so that they create a permanent physical connection. This newly formed textile fibre resp. textile yarn is now ready to be combined with all standard yarns and still keeps its functional properties.

These properties and effects are:

- ▶ Antimicrobiological effect = slows down the growth of bacteria which also minimises body-odour
- ▶ Oligodynamic effect = has got an antiseptic effect like copper, gold or silver etc. against certain pathogens
- ▶ Catalytic property = The usually very slow or inhibited reduction of resistant organic-chemical compounds is sped up (e.g. unpleasant odours are eliminated)

## SILVER-POINT

With SILVER-POINT lining you made the right decision:

- ▶ Absorbing humidity
- ▶ Built-in protection by silver ions
- ▶ Antibacterial effect according to DIN EN ISO 20645
- ▶ Odor-inhibiting by germ reduction

## COMFORTEMP®

- ▶ Innovative mPCM-Technology developed by Freudenberg (micro-encapsulated Phase Change Material - micro-capsules equalizing temperature, bedded in non-woven materials)
- ▶ When body-temperature increases the micro-capsules change their physical state and become liquid for a cooling effect. The decrease of body temperature makes them turn back to solid for a warming effect.
- ▶ Excellent breathability and ideal transport of humidity provoke a comfortable, dry sensation.
- ▶ No matter if you are at work, doing sports or in your free time Comfortemp® provides you with your personal climate-balance.

## ON STEAM®

On steam® is a new breathable high-tech microfiber lining with an absorption capacity of 8 times its weight in water. It offers a maximum comfort and a complete dryness for a perfect foot climate.

Technical characteristics:

- ▶ Absorbs moisture and desorbs it to the outside
- ▶ Breathable - antimicrobial - odor avoiding
- ▶ Temperature regulating
- ▶ Anti-allergy
- ▶ CO<sub>2</sub> neutral production
- ▶ Control of harmful substances according to Öko-Tex Standard 100

## RUN-DRY

With run-dry a new, multifunctional compact material has been designed. A total composite constructed from 3 materials that includes several features.

It's an unique triad of innovative materials made from an high tech non woven fabric placed between a highly abrasion resistant and water repellent upper material and a moisture absorbing lining material. All of this gives run-dry a new dimension of multifunctionality.

Active on inside and outside, foot sweat is transported away and moisture does not penetrate. Other advantages are a high level of breathability, fast drying and a noticeable highest class wearing comfort.

## INFO ICONS

STEEL TOE-CAP

COMPOSITE TOE-CAP

ALUMINIUM TOE-CAP

METAL FREE

SUITABLE FOR KITCHENS

REPLACEABLE INSOLE

ORTHOSTAT (INSOLE)

SENSOSTAT (INSOLE)

HEEL AND FOOT LIFT

ESD

WASHABLE AT 30° C

WASHABLE AT 60° C

AUTOCLAVABLE

HACCP-COMPLIANT
