

Shelves and cabinets

There's a place for each item

Shelving units and cabinets are an essential element in keeping the workplace tidy and in good order. Shelving units can also be used as room divider elements and are available with ESD protection.

Extended tool life

The service life and condition of tools can be significantly improved through their appropriate storage. They are stored in their own places, protected from dust and dirt, in a locked cabinet.

A versatile storage solution is created by using suitable accessories

An open shelf is not always the best way to store things. Tools, expensive equipment, and small items need another type of solution. Through using lockable drawers or adding doors and walls, an open shelving system is turned into a versatile storage solution. Drawers can be fitted with a variety of interior combinations, to suit the tools stored in them

The Treston shelving system is modifiable

Our storage system is built around the basic component, and extension parts, doors, screens, and other accessories can be added to create an efficient overall solution. In addition the shelf heights can easily be adjusted as needed. Even the load capacity can be increased by adding additional supports.

Treston industrial cabinets allow for a tidy, efficient working environment

No unnecessary time should be used looking for tools and materials. This interrupts work and causes stress. In a well organised cabinet, everything is where it should be.

A ready-assembled cabinet is easy to move to the most convenient location. There are adjustable glides underneath that make it easy to adjust the cabinet so that it stands straight on uneven surfaces. All M750 and accessories, such as shelves, drawer units, perforated panels, and extendable shelves, can be used in selecting accessories for the cabinet.

Shelving system

The Treston shelving system can be built as a combination of cabinets and shelves and can be used as a space divider. The shelving system is available in two standard heights, 200 cm and 240 cm and two widths, 80 cm and 100 cm.

The W x D x H rule

All our dimensions follow a WDH rule, where the first dimension is the width (W), the middle the depth (D), and the last the height (H).

1. Standard parts

Name	Size W x D x H mm	Code
Standard part 80/30/200	824 x 300 x 2000	C 313 49 001

Industrial cabinets

High-quality industrial cabinets are made of epoxy powder coated steel. The frames are painted with light grey RAL 7035 and doors either with blue RAL 5007 or with light grey RAL 7035. The cabinet frames have a lock with two keys, sturdy double leaf-doors and adjustable feet, and with a wide range of accessories it can be easily customized into versatile storage solutions, e.g. for tool storage or shelving. The industrial cabinets are pre-assembled.

NEW: All of the cabinets are now available with an ergonomically designed and functional turn handle mechanism with integrated key lock!

The cabinet can be opened and closed without keeping the key in lock. The key is needed only for locking the door. This locking method can be ordered by adding a T in the end of the product code (e.g. C309 07 000 T).

New handle lock is also available to the industrial storage system and heavy storage system cabinets.

2	Steel shelf 80	854 345-49

Also ESD versions available!

All the industrial cabinets can be ordered as ESD versions by replacing the colour code 07 (blue) with 49 (ESD light grey). This means that in addition to the cabinet frame, the doors will also be painted with light grey ESD paint, RAL 7035. Please remember to use only ESD bins and mats with these ESD industrial cabinets.

Move with a pallet truck

The cabinet can be moved with a pallet truck or a forklift when the plinth front panel has been removed. Cabinets are equipped with adjustment screws.

Storage and charging cabinet

A storage and charging cabinet is ideal for storing personal valuables during the workday and at the same time it provides a possibility to charge mobile phones/tablets/laptops. The storage and charging cabinet consists of six lockers and each locker is equipped with a double socket and a secure electronic code lock. This electronic locking system replaces keys with a numerical code.

The locking system is operated with 2 x AAA batteries and is thus independent of an external power supply. Due to an automatic low power (sleep) mode, the batteries are long lasting, and even when the battery power is low, the lock can still be opened up to 300 times.

Storage and charging cabinets are made of epoxy powder-coated steel. The frames are painted with light grey RAL 7035 and doors either with light grey RAL 7035 or with red RAL 3002. On the back panel of the lockers there is perforation for air ventilation. The inner measurements of the lockers are D x W x H 430 x 310 x 205 mm. Storage and charging cabinets are pre-assembled.

Name	Size W x D x H mm	Internal locker dimensions mm	Code
Storage and charging cabinet, grey doors	350 x 540 x 1525	310 x 430 x 205	SCC-41
Storage and charging cabinet, red doors	350 x 540 x 1525	310 x 430 x 205	SCC-25
